GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

STATEMENT OF WATER DIVERSION AND USE

83217

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Coachella Valley County Water District
Address P. O. Box 1058 Coachella, California 92236
- B. Name of body of water at point of diversion Andreas Creek near Palm Springs
Tributary to Palm Canyon. Tributary to Whitewater River
- C. Place of diversion $\frac{1}{4}$ Section 2, Township 5S, Range 4E, SB B&M,
Riverside County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks. The stream spreads and infiltrates over portions of approximately 3 or 4 sections, which are reserved and managed for this function.
- D. Name of works Andreas Creek Spreading Area.

- E. Capacity of diversion works cubic feet per second
gallons per minute
gallons
acre-feet
Capacity of storage reservoir spread
State quantity of water used each month in gallons or acre-feet
- | Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
| 1966 | 270 | 181 | 161 | 110 | 72 | 51 | 30 | 53 | 23 | 52 | 68 | 1860 | 2931 |

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. Water Extracted by wells to supply 58,000 people also irrigates approximately 10,000 farm acres.

- Maximum annual water use in recent years gallons
acre-feet
Minimum annual water use in recent years gallons
acre-feet
Type of diversion facility: gravity _____, pump _____
Method of measurement: weir _____, flume _____, electric power meter _____, water meter _____, estimate _____

- F. Purpose of use (what water is being used for) 23,200 Ac. Ft. for Domestic Use
69,000 Ac. Ft. for Farming

- G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Coachella Valley, Within District Service Areas

- H. Year of first use as nearly as known 1918

- I. Name of person filing statement Lowell O. Weeks
Position Gen. Manager-Chief Engineer Organization Coachella Valley County Water District
Address P. O. Box 1058 Coachella, California

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed September 11, 1967

Signature Lowell O. Weeks
